We Aim to Tell You the Truth—We Are Farmers, Too, and Don't Try to Sell You Any Varieties We Ourselves Would Not Plant

No Cash Payment Before Shipment

You examine stock before you pay. This offer applies only on orders amounting to \$3.00 or more, for shipment on or before April 25, 1958.

We are one of the first nurseries in this section of the country to adopt this unique selling plan, whereby it is possible for customers to order without sending any money. Make out your order at full prices listed in catalog, and instruct us to ship C.O.D. express or parcel post, subject to your examination by express only, as the postal authorities do not permit examination of parcel post shipments.

Look over the shipment and see for yourself whether the stock is in good condition. If shipment is satisfactory, pay your express agent the amount due and the plants are yours—still covered by our guarantee. What could be more fair? We simply must furnish good nursery stock or we couldn't possibly afford to make this offer.

We would advise all small shipments sent by mail, and will send your order by parcel post C.O.D. for purchase price, plus postage, if you prefer. All such shipments are fully covered by our guarantee.

NOTICE: The above offer does not apply on orders amounting to less than \$3.00; on Special Bargain Collections; Special Quoted Prices; nor on any orders specifying shipments later than April 25th, 1958. Cash in full must accompany orders under \$3.00, or those calling for shipment later than April 25th; but on such orders customers will be entitled to our cash discounts from regular catalog rates, as explained at the right.

WE GUARANTEE SAFE ARRIVAL OF ALL SHIPMENTS MADE ON OR BEFORE MAY 25th, 1958.

We reserve the right to cancel all printed prices without notice.

Order Early and Make a Big Saving 10% DISCOUNT ON ALL CASH ORDERS

(Except on Bargain Offers and Special Quotations), Received before February 1st, 1958.

To those who wish to send all cash with order, we offer these special cash discounts from our regular printed prices (except on Bargain Offers and special quotations).

Pay Cash and Save Additional Cost on C.O.D. Shipments

Some concerns add 5 per cent to their list price, in addition to the required C.O.D. fees, if order is for C.O.D. shipment. Knowing our stock will be satisfactory, we will ship C.O.D., if you prefer, at our regular printed price, although we want to remind you of the collection and money order fees on C.O.D. shipments. These charges, over which we have no control, or do not receive one cent of the fees, amount to approximately 5 per cent on average orders. You can save this 5 per cent by sending cash with order. You take no chances—all shipments are backed by our guarantee.

Furthermore, we will, at our option, either replace free of charge, or refund purchase price on any stock that arrives in bad condition, providing claim is made within 10 days after arrival. After 10 days, it is mutually agreed that stock is satisfactory. If stock is unsatisfactory on arrival, be sure to get signed statement from your express agent or postmaster showing extent of damage, and send this along with your claim. Do not return plants unless so instructed by us.

Continued growth depends upon soil, climatic conditions, planting and care—conditions we cannot control—hence is not guaranteed.

Sub-Zero ROSES

Easy to Grow — Long to Live — Save
REPLACEMENT EXPENSE

These are the famous Brownell Sub-Zero Roses — a New Race of hardiness previously unknown in Roses. They are more vigorous, can live many times longer, are easier to grow, bloom more abundantly and more consistently, and their size, form and color compare with the best of the common Roses. Why? Because they are bred back to hardy species. They are super-hardy roses that absolutely won't kill out even in temperatures that dip 25 degrees below zero. The technical meaning of our "Sub-Zero" is wood safe to about 15 degrees below zero unprotected; killed up with a little clean dirt 25 degrees below and colder; well hilled up about 95% safe at 50 degrees below. Because they are so hardy we guarantee them unconditionally to live through one year without winter killing. Best of all they are free blooming, and the flowers last a long time. We are offering this unique strain of roses in 5 varieties of Hybrid Tea Bush Roses as follows:

HOLLIES as House Plants

The Traditional Christmas green, is familiar to everybody, but Holly as a house plant is something new. Just imagine this unique little tree growing in your living room and producing bright red berries at Christmas time! No more trouble than growing ordinary house plants — simply repot in a fairly firm soil, being sure the space around and under the root ball is filled in snugly with garden loam, to which moisture-holding humus has been added. A mulch of peatmoss or compost is also desirable. Water should be applied often enough to keep foliage fresh and crisp, with occasional sprayings to wash off dirt. Do not fertilize during winter, but start in March, using a liquid house-plant fertilizer. Then, after all danger of freezing is past in the spring, like many other house plants, it can be given an outdoor vacation, by sinking the pot and plant in your garden bed. We are pleased to offer these in **SEXED** plants — Male and Female. One of each should be planted to insure proper pollination. Specify kind wanted. **Price: Fine plants, out of 2 1/2-inch pots, \$1.25 each; 2 for \$2.25. Net, not postpaid.**

THE ROSE GARDENIA

(Gardenia Veitchi.) The Gardenia is the most popular and fashionable flower — the flower of romance! It makes a grand house plant. Blooms from early spring until fall. Flowers are waxy white; foliage rich glaucous green. Plants prefer living room temperatures. Culture same as Geraniums. **Price: Strong plants, \$1.10 each; 2 for \$2.00. Net, postpaid.**

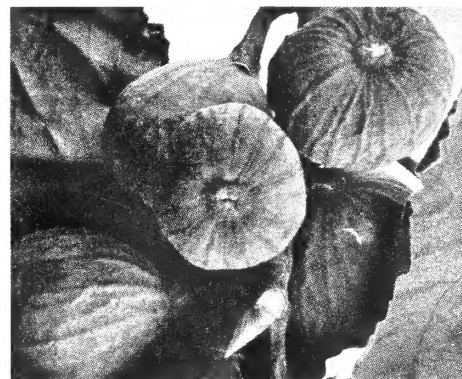

PIGMY DATE PALM Fruit for Your Living Room

The Piggmy Date Palm is a close relative of the larger commercial variety. While in warm climates it will reach a height of ten feet, it seldom grows over two or three feet high indoors. From an ornamental standpoint, the Piggmy Date Palm is just as attractive and desirable as other varieties of Palms, and in addition it will produce edible fruit in your own living room, under pot culture, as well as outside in the South. **Price: \$1.10 each; 3 for \$2.75. Net, Postpaid.**

NEW DWARF ORANGE

(Otaheite Orange.) A grand pot plant of great beauty and novelty. Its glossy green leaves, fragrant waxy white, faintly tinted with pink, blossoms create a most pleasing sight. Fruit is about one-fourth the size of an ordinary Orange. A 5-inch pot has been known to carry 10 to 12 oranges at one time. **Price: Strong plants, \$1.10 each; 2 for \$2.00. Net, postpaid.**

DWARF FIG

As an interesting and satisfactory House Plant! As a pot or tub plant it is an abundant bearer of the most delicious fruit. Plants bear the first year and abundantly each year thereafter. The fruit is very sweet and of fine quality. These should be planted in 4-inch pots and, when their roots fill those pots, should be shifted into 6-inch pots. Any good porous soil containing humus and plant food is satisfactory. Figs will not ripen when grown in too acid a soil; a soil with an approximately neutral reaction is best. Often times bears two crops a year when grown in a greenhouse. Field-grown plants for outdoor planting are offered on page 34. If desired, these potted Fig plants may be given an outdoor vacation during the summer, the same as the Holly. **Price: \$1.10 each; 2 for \$2.00. Net, Postpaid.**

Especially valuable for hedges and borders in cold, exposed locations. When planting, cut back to 4 inches above ground to make hedge bushy at bottom. The Department of Agriculture estimates that insects do over a billion dollars' damage a year to our crops, while the value of birds in combating these insects is over 300 million dollars. Besides their value in destroying insects, many species help in keeping down weeds. Offer the birds board and lodging by planting berry producing shrubs, and you will have a host of willing helpers, working tirelessly for you throughout the whole year.

Insect-eating birds flock to farms where a side dish of brilliant shrubs and tree berries has been planted.

FRUIT *Out of the Ordinary*

Bring The Delicious Taste Of Far-Away-Lands Into Your Own Home—

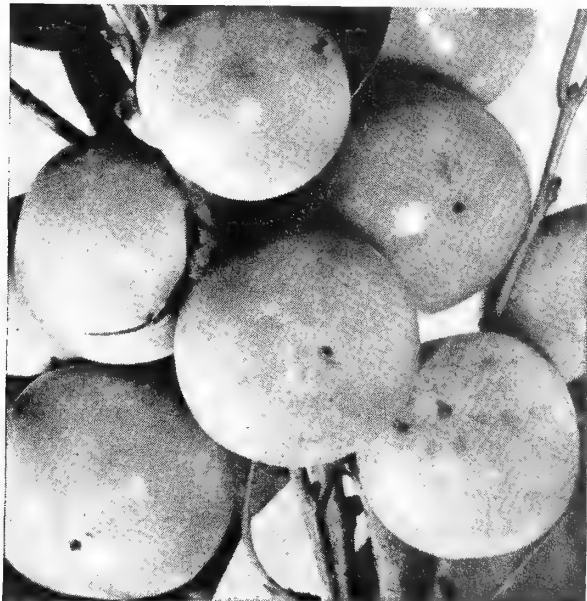

Everbearing Fig

EVERBEARING FIG

3-220 — Our Dwarf Fig is particularly adapted to growing in the north as it does well in either tubs or in the open ground. The root is perfectly hardy. Should tops freeze, it can be cut to the ground, and when it begins growing again it will produce fruit on the new wood. We recommend tub culture north of Philadelphia. Plants bear the first year they are set out, and abundantly each year thereafter. The fruit is of good size, sweet and delicious with flesh that is firm and meaty. Is an excellent fruit for making preserves, jams, canning, drying or to eat fresh. **Price: 2-3 ft. trees, \$1.45 each; 2 for \$2.75.**

OLD-FASHIONED PAW PAW

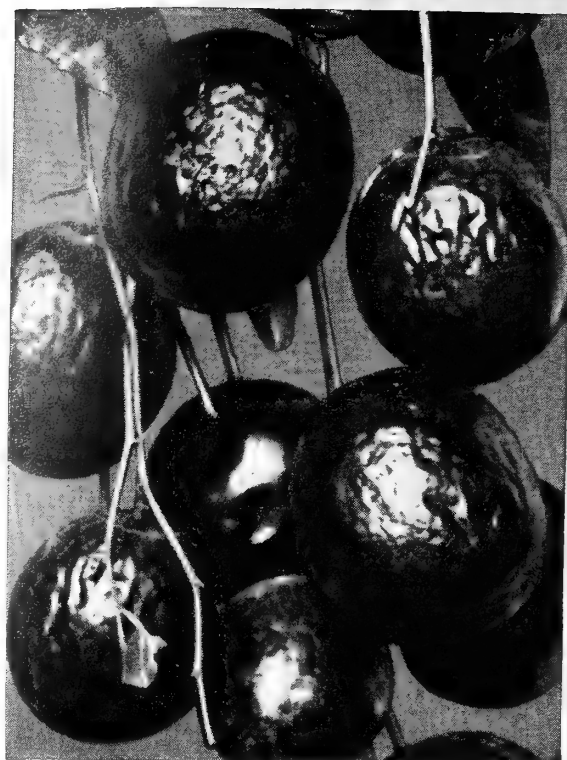

3-355 — (Michigan Banana Tree). A handsome tree attaining a height of about 20 feet. Has large purple flowers, which are very beautiful and fragrant. Makes a handsome tree for the park or lawn as the foliage is large and dark green. Produces good size yellow fruits which have the flavor of the banana and are very delicious. Although the fruit is somewhat shorter and thicker than the banana, the resemblance is very close. Trees are hardy and can be grown anywhere in the U. S. Prefers a shady location and somewhat rich humus soil. **Price: 2-3 ft. trees, \$1.95 each; 2 for \$3.50. 3-4 ft., \$2.45 each; 2 for \$4.50; 5-6 ft., \$2.95 each; 2 for \$5.50.**

Hardy American Persimmon

Old-Fashioned Paw Paw

Hardy Chinese Dates

HARDY CHINESE DATES (Jujube)

3-219 — Coming from the high interior of China, it is quite hardy, the U. S. Dept. of Agriculture bulletins reporting it has withstood 22 degrees below zero without injury. It is adapted to a wide range of territory and all kinds of soil.

It blooms very late in the spring. The tree is a heavy and constant bearer, commences to bear at an early age; four-year-old trees having produced 150 pounds of fruit. The chocolate-colored fruit is one to two inches long. Delicious eaten fresh or cured like dates. **Price: 2-3 ft. trees, \$2.95 each; 2 for \$5.50.**

ORNAMENTAL TREES

Clump Birch

3-214 — BIRCH, Cut-Leaf Weeping. A tall slender type of tree of vigorous growth, with graceful, drooping branches, silvery white bark and delicately cut foliage. 2-Yr., 3-4 ft. trees, \$2.75 each; 2 for \$5.25. 4-5 ft. trees, \$3.25 each; 2 for \$6.25.

3-213 — BIRCH, American White. A large, vigorous, upright tree with broad, handsome leaves and brilliant white bark. (Note the bark of young trees has a reddish cast, which disappears within a year or two from planting.) 2-Yr., 3-4 ft. trees, \$1.75 each; 2 for \$3.00.

3-227 — BIRCH, Clump Form. Same strain as American White, but produce two or more trunks from one root. Bark white on mature trees. An outstanding tree for your yard. 2-Yr., 3-4 ft. trees, \$2.95 each; 2 for \$5.75.

3-201 — ELM, CHINESE. (Ulmus Pumila). Very rapid grower. Will give ample shade in only 5 to 6 years. Dense, dark green foliage. First to leaf out in the spring. Very hardy. 2-Yr., field-grown, transplanted trees, 5-6 ft., \$1.75 each; 2 for \$3.25; Heavy, 6-8 ft. trees, \$2.25 each; 2 for \$4.00. King Size, 8-10 ft. \$3.25 each; 2 for \$5.95.

3-228 — LOCUST, Moraine. (Plant Pat. No. 836). America's Great New Shade Tree that is Thornless, Seedless, Fast Growing, Long Lived, and one which will grow anywhere. It is a round headed tree when young but tall and vase-shaped when older. Mature trees are 80 to 100 feet in height with lower branches high enough to clear any ranch-type house. The finely cut foliage allows enough light to filter through to promote excellent growth of lawns, yet provides shade dense enough to discourage growth of crabgrass. Very little pruning is needed as the lower limbs self prune as the tree grows. As it is sterile, there are no unsightly seed pods to clutter up the lawn. Tests show this new tree to grow more rapidly than either Silver Maple or Chinese Elm. It withstands drought, heat and cold. Excellent for either lawn or street planting. Fine 5 to 6 ft., BRANCHED TREES, \$5.50 each; 2 for \$10.00. Net, not subject to a discount.

3-223 — MAPLE, SILVER. Very hardy, rapid growing tree. Their irregular growing leaves are a silvery green, turning to yellow and bronze in the fall. 3-Yr., 6-8 ft. trees, \$2.45 each; 2 for \$4.50; 4-Yr., heavy 8-10 ft. trees, \$3.95 each; 2 for \$7.50.

New "HARLEQUIN" Variegated-Leaved Maple. In our opinion, Harlequin is the most beautiful shade tree in existence today. It is a Norway Maple with a variegated leaf. Quite a sensation with its leaves that are green in the center with a beautiful ivory edging. The symmetrical, round top makes it a beauty, and it grows to about 30 ft. Can be grown anywhere that Norway Maple can. 4-5 ft. trees, \$3.95 each; 2 for \$7.50.

LOMBARDY POPLAR. Tall, slender growing tree, appearing as tall sentinels at a distance. Dark green leaves, lighter shade on under side. Ideal for screening, windbreaks and back-grounds. Grow very rapidly. 4-5 ft. trees, \$1.00 each; 3 for \$2.75. 5-6 ft. trees, \$1.45 each; 3 for \$3.95; 10 for \$8.50. King size, 8-10 ft., \$2.50 each; 3 for \$7.00.

PIN OAK. One of the best of all Oaks — a noble and attractive shade tree. One of the fastest growing of the Oak family. Develops into a handsome, tall, branching pyramid with drooping branches as it matures. Has beautiful, rich green, carved foliage turning into gay orange and red coloring in fall. Very long lived and hardy. 40 to 50 feet at maturity. PRICE, 3-4 ft. trees, \$1.95 each; 2 for \$3.75.

3-203 — WILLOW, WISCONSIN WEEPING. (Salix blanda). A graceful tree of large size. Its long, fine leaves on slender branches are a fresh, bright green tint. Rapid growers. 2-Yr., 4-5 ft. trees, \$1.10 each; 3 for \$3.00; 10 for \$9.50. 5-6 ft. trees, \$1.50 each; 2 for \$2.85; 5 for \$6.45. King size, 8-10 ft., \$2.00 each; 3 for \$5.75.

"The KING of FLOWERS"

"USUALLY \$10.00 to \$15.00 EACH and SCARCE AT ANY PRICE." WHILE THEY LAST! Strong, One-Year grafts, \$2.75 each; 2 for \$5.25; 4 for \$9.95, Postpaid and Net.

TREE PEONIES are a low many branched shrub, growing 3 to 4 feet high, bearing giant size flowers in many shades of red, pink, purple, and white. They have been grown in China for a thousand years, first in the gardens of the Ming Emperors, where they gained the name "THE IMPERIAL FLOWER OF CHINA". The Chinese also call them "THE KING OF FLOWERS" because of their rare beauty and king-size blossoms. The flowers often measure 10 to 12 inches across, and have the texture of fine crepe silk. They are fragrant, are hardy — long lived — disease resistant. Grow well in any climate. Have been known to withstand 40 degrees below zero temperature. Need very little care. The sparkle and beauty of TREE PEONIES in full bloom are beyond description, and are even more spectacular and beautiful than the finest hybrid Rhododendron.

When ordering, please give first, second and third choice in the following colors offered, as supply is limited and we know many colors will be exhausted within a few weeks after you receive this book.

Colors offered: Red, Pink, Purple, and White.

ORNAMENTAL TREES

RED SILVER FLOWERING CRAB

3-227 — In our opinion, the most colorful Flowering Crab ever introduced! Completely red in flower, leaf bark and fruit — rich maroon-red from top to bottom. Most flowering Crabs are preferred due to the mass of blooms which they produce for a short time, but the Red Silver is beautiful from spring until late fall because of its all-over red color. The leaves are somewhat cut-leaf, the under side of which are somewhat tinsel with silver — the blend of maroon and silver is a unique combination throughout the season. The wonderfully fragrant red flowers are large, partially double and altogether lovely. Delightful red fruits in the fall. Price: 2-Yr., 3-4 ft., \$2.45 each; 2 for \$4.45.

Magnolia
Soulangea

MAGNOLIAS

Showy and Hardy

Among the finest of all ornamentals are these hardy Magnolias. Their flowers are produced early in the spring before the leaves appear. Mature to a height of 8 to 10 ft. Plants begin blooming when quite small, often flowering in the nursery row when only 18 to 24 inches tall. We are offering these in two of the best varieties:

3-335 — Soulangeana. Large, bell-shaped blooms measuring 4 to 6 inches across, delicate pink in color, and of beautiful waxy sheen.

3-336 — Soulangeana Nigra. Flowers are a beautiful purplish-red outside, while the inside is a delicate waxy white. Blooms measure 5-7 in. across.

PRICES: Soulangeana and Soulangeana Nigra: 18-24 in., \$2.95 each; 2 for \$5.75. 2-3 ft., \$3.95 each; 2 for \$7.50. Be sure to specify variety wanted.

Dwarf Japanese Red Maple

BECHTEL'S DBL. FLOWERING CRAB

Truly a Rose in Disguise!

3-216 — The only genuine Double-Flowered Crab. Makes a medium-sized tree; perfectly hardy. When in bloom, is covered with delicate pink, perfectly double, small, rose-like flowers of delicious fragrance. Blooms very young. 2-Yr., 2-3 ft. trees, \$1.50 each; 2 for \$2.75.

TULIP TREE

(*Liriodendron tulipifera*). Tall growing, stately tree with smooth bark and large, irregularly shaped leaves of glossy green; ideal for quick shade. Blooms late May and early June, bearing numerous tulip-like flowers 2 to 3 inches long. Price: 2-Yr., 3-4 ft. transplanted trees, \$1.35; 2 for \$2.50.

DWARF RED LEAF MAPLE

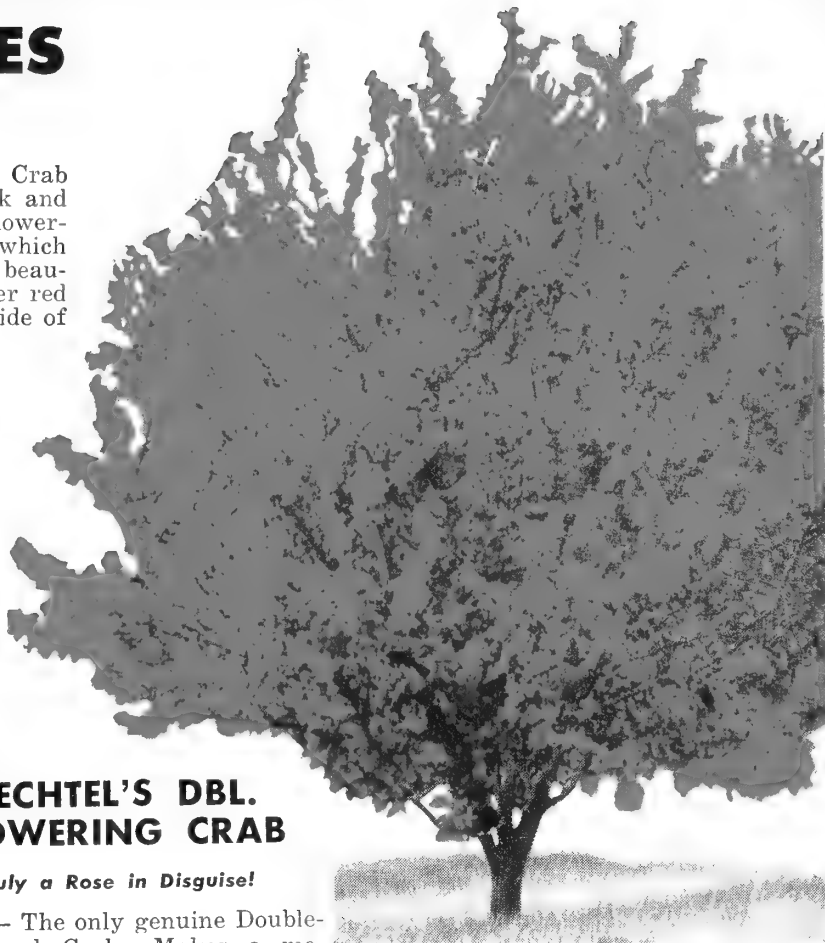

2-153 — Hardy, dwarf-growing tree, seldom maturing over 10 feet. Their indented leaves are vivid blood-red in spring, which dulls to bronzy purple red or bronze-green in fall. Price: Strong well rooted, 3-4 ft. trees, \$5.50 each; 2 for \$10.00. Net, no discount.

GOLDEN CHAIN TREE

(*Laburnum Vossii*). Flowers of purest golden-yellow are borne in long, graceful clusters 12 to 18 inches long, during the spring. In full bloom, this rare ornamental is a real show-piece and one of the most beautiful low-growing ornamental trees we know of. Large, clover-shaped foliage; individual blossoms resemble Sweet Peas. GRAPE VINES

A Lifetime Investment

THE GREAT Interlaken Seedless GRAPE

A California Seedless type That Is Hardy in the North. Interlaken was originated at the Experiment Sta. in Geneva, New York, by crossing the Thompson Seedless with the Ontario. It has proven hardy in temperature to 15 degrees below zero. The fruit is very sweet and of excellent flavor. The flesh is meaty and crisp and of excellent texture. The cluster of berries is of medium size, golden amber color. It ripens a full month before Concord — here in the North about Aug. 30th. This variety promises to become one of the leading fresh fruit grapes due to its hardiness, excellent quality and flavor. **PRICE:** 1-Yr. vines, 85c each; 3 for \$2.25; 6 for \$4.15.

New STEUBEN. A new introduction of a Blue-Black grape by the New York Experiment Station. Never have we tasted a Grape of such exquisite flavor. Melting, tender, sweet with a delicate perfume-like flavor. Fruit is of outstanding quality, and the vine very hardy; grows huge, perfectly formed, long slender clusters. Ripens a few days before Concord, but keeps well until Christmas. Has produced a full crop after 20 below zero temperatures. Vine is so vigorous, has produced grapes absolutely free from rot and mildew without spraying. We consider this the greatest blue Grape ever grown. **PRICE:** 1-Yr. vines, 70c each; 3 for \$2.00; 6 for \$3.75. Strong, 2-Yr. vines, \$1.35 each; 2 for \$2.60; 5 for \$6.25.

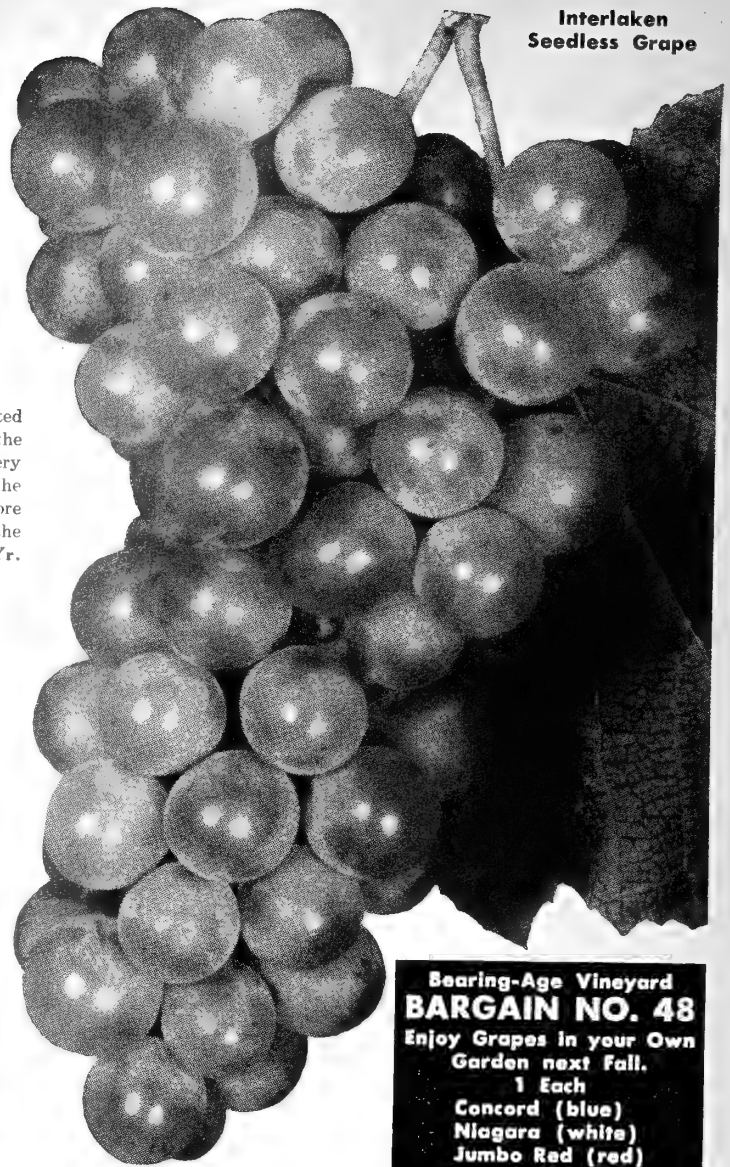

1E-25 — GOLDEN MUSCAT. Possesses a rich color and the finest Muscat aroma of the European Muscat. For home use and roadside market, it is one of the best. The vine is vigorous, productive; the clusters are very large, tapering, single-shouldered and compact. The berries are large, oval, juicy, tender, sweet, vinous and aromatic. Ripens 10 days earlier than Concord. **PRICE:** 1-Yr. vines, 50c each; 6 for \$2.50; 12 for \$4.00. 2-Yr. vines, 80c each; 3 for \$2.25; 6 for \$4.00.

1E-36-SENECA. A variety that is entirely different, not just another variety. Ripens early; bunches are of good size, tapering and compact. The berries are oval in shape, and golden yellow. Texture firm, like the California grape, and the skin can be eaten with the berry. Flavor is sweet and aromatic; texture is melting and tender. Moreover, it keeps well on the vine or off, in storage until Thanksgiving. **PRICE:** 1-Yr. vines, 40c each; 6 for \$2.10; 12 for \$3.50. 2-Yr. vines, 75c each; 3 for \$2.10; 6 for \$3.85.

1E-22-CONCORD. Most popular grape of them all. Large, purplish-black Grape. Large-shouldered, compact bunch. Flesh is juicy, sweet and tender, excellent flavor. Vine a strong grower, very healthy, hardy and productive. Ripens in October. See price below.

1E-23-FREDONIA "The biggest money-maker of all times." (See what one of our customers say about this wonderful variety at bottom of page). Has produced as high as 2800 four-quart baskets per acre. Fredonia is one of the best early ripening black grapes, ripening 15 days earlier than Concord.

The vine is very disease resistant, vigorous and productive — makes new wood so fast it bears the second year. Of finest quality: the clusters are large size, cylindrical and very compact, berries large, round, and hang well to the bunch. The skin is thick and tough, the flesh is juicy, solid, but tender. See price below.

1E-24-NIAGARA. The standard white Grape. Ripens with Concord. Bunch and berries large. Very hardy and productive. Excellent wine grape. **Limit: 100 Niagara plants to each customer.** See price below.

Jumbo Red Grape

Large as a Quarter

The Giant of all Grapes — Individual Kernels Size of a Plum. We introduced this variety in 1946. We believe it came from a sport or seedling as one vine was found in a vineyard of Concord some ten years ago; the fruit is entirely different than any variety we have ever seen. An amber-red when ripe, with individual kernels the size of a plum, in many cases. Bunches are compact, weighing one to two pounds. Very hardy. Will grow on most any soil. Makes one of the prettiest and tastiest jellies we know of — a bright, sparkling red, with a flavor all its own — not like common grape jelly.

As usual, our supply is very small, and we are again limiting each customer to twelve plants.

PRICE: 1-Yr. vines, 60c each; 6 for \$3.00, 12 for \$4.85. 2-Yr. vines, \$1.10 each; 3 for \$2.95; 6 for \$5.15.

ROYAL RED LEAF PEACH

An ornamental tree with RED FOLIAGE — bright red early in the spring, gradually dulling to a deep maroon towards fall. Its deep rose blossoms against the red foliage create a most pleasing contrast. Produces full crops of perfectly round, inch and a half diameter peaches — just right for pickling. Fruit has all over red coloring; flesh is white with a delicious sweet flavor. Ripens late, with the Gold Drop. Our strain is far redder than foliage on most trees offered by other growers and therefore have named ours "Royal", this assures you of the genuine red strain.

PRICE: 1-Yr., 3-4 ft. trees \$1.50 each; 2 for \$2.75; 4 for \$5.00. 4-5 ft. \$1.95 each; \$3.75 for 2.

Ackerman's New **MONTMAMMOTH CHERRY**

Bears Youngs — Easy to Pick

3-312 — This variety was found by Lee McClain, of Knox County, in 1928. A sport of the Montmorency. Bears second year — no waiting for fruit. High quality cherries are large, often calipering an inch in diameter. As the tree is dwarf and spreading in growth, it is much easier to pick than other varieties, as the bulk of the crop can be harvested from the ground. Heavy producer — 3 to 5 fruits per spur. Records show the parent tree produced 6-gallon crate of fruit the third year.

PRICE: 1-Yr. 2-3 ft. trees, \$1.45 each; 3 for \$4.15; 10 for \$12.95; 25 for \$30.00
3-4 ft. trees, \$1.65 each; 3 for \$4.75; 10 for \$13.95; 25 for \$32.50

RED DOLGO CRABAPPLE

3-327 — We know you will say "Dolgo is the Best Tree on the Place", when it starts to bear. A fruit tree that is attractive enough to plant in your lawn as a flowering crab. Clouds of dainty blooms in early spring, followed by unbelievable "red" fruit. Tree is dwarf in size, but grows fast. Bears very young, often the second year. Apples are bright red in summer, deepens to blood-red in autumn, then wine-red as leaves turn yellow. Fruit clings to tree until long after frost. Very hardy. Very good for pickles and jellies; sauce has lots of zip and it doesn't taste like usual Apple Sauce. Even when ripe, the fruit has so much pectin that the pickle juice will jell.

5 New Peaches You Will Find Profitable

RICHHAVEN

A new Peach which originated at the Michigan Agricultural Experiment Station. Ripens with Halehaven, about 14 days before Elberta, but because of its bright color, it might be picked 2 to 3 days before Halehaven. Fruits are larger than Halehaven, nearly round, and uniform in size and shape. The ground color is bright golden, overlaid with a large, bright red blush on the area exposed to the sun, with stripes of red and gold on the opposite side. Fuzz is so short and soft as to be nearly unnoticeable. Flesh is clear yellow with moderate amount of red near pit. Medium in texture and resistant to browning. Freestone. Excellent for commercial canning. Unusual thick, tough skin adds to handling and shipping ability of fruit. Trees are large, vigorous and productive.

SUNHAVEN

Ripens 40 Days Earlier than Elberta

The success of the Redhaven variety resulted in many requests for a variety of this type maturing earlier. Sunhaven is being introduced to meet this need. It ripens very early, 10 days before Redhaven and 40 days earlier than Elberta. Fruit is medium-large in size, nearly round, and uniform in shape. Skin color is much like Redhaven, largely bright red with enough bright gold color for pretty contrast. Short, soft fuzz, almost unnoticeable. Fruits keep and handle unusually well for such an early maturing variety. Flesh is clear yellow, fine-texture, firm, of good flavor and very resistant to browning. Sunhaven is a freestone when fully ripe. Its early ripening assures you of BIG PROFITS for your fruit.

RED SKIN-New Red Color!

3-324 — Hardy — Productive, Large, Beautiful and Delicious! All five characteristics wrapped up in this one wonderful new Peach. Although this variety was released by the Maryland Agriculture Experiment Station about ten years ago, it is a new variety to the Central and Midwestern states. Redskin is a cross between the well-known J. H. Hale and Elberta varieties. Is a freestone peach, ripening with Elberta, and has a beautiful red color. The good qualities of both Hale and Elberta have been combined so that we predict Redskin will eventually become as popular commercially as Elberta is today. The fruit is round and yellow-fleshed with little or no red near the pit, and develops good size even with a heavy load. Delicious flavor, making it ideal for dessert or canning purposes. Excellent shipping qualities.

As this variety is an extremely vigorous grower, we recommend planting not more than 75 trees to the acre. Also, as Redskin is both winter-hardy in bud and cold-resistant in blossom, the tree will produce exceptionally heavy loads of Peaches, you will have to thin very heavily so as to prevent tree breakage, and at the same time, be assured of real large fruit.

Redskin is self-pollinating. Due to its red color, size and excellent qualities, superior prices have been received for this variety during the Elberta season.

YELLOW-GOLD GIANT

1-39A. A peach that has everything desirable in a yellow freestone, including hardiness, great beauty and high quality. Peach is exceptionally large, perfectly round, and so brilliant yellow in color it appears to be "shimmering gold" — so yellow, in fact, one does not notice that it has a slightly red cheek. Fruit is equally as large as the well-known J. H. Hale, but is self-fertile; is highly flavored and an exceptionally good variety for canning. Skin is very firm, which means excellent shipping qualities. Yellow-Gold Giant ripens about the same as Elberta — early in September. This is a self-fertile variety and a freestone. Tree is hardy and a good producer. See price under Red Skin.

AMBER GEM-Best for Canning

1-32 — This grand variety is a semi-cling; shaped like an Elberta and ripens same time. Beautiful yellow flesh with deep red blush; delicious honey-sweet flavor. Will hang on the tree for 10 days to 2 weeks after it ripens. One of the largest peaches grown. Used extensively by all canning factories. Hardy and very productive. See price under Red Skin at left.

New SUMMER LONG EVERBEARING PEACH

(Plant pat. No. 1503)

Something new in Peaches which we offered for the first time 2 years ago. Peaches from the last of July until the first of October. Actual photograph showing the Summer Long in its various stages, from blossom to matured fruit. BEARS YOUNG — usually the second year after planting, with a nice crop the third year. Fruit is yellow, juicy and very sweet flavor; free stone, very firm quality. Tree is very vigorous and healthy — the original parent tree attained the age of 22 years without any care or spraying. Two trees of this variety in your backyard will furnish you with Peaches throughout the summer. PRICE: 3-4 ft. trees, \$2.95 each; 2 for \$5.75; 4 for \$11.00.

RED-GOLD GIANT

THE IMPROVED HALE!

Bears Young - Fine Shipper - Very Hardy!

1-38 — Truly the GIANT of the Peach family — many peaches weighing 1 pound each — the largest Peach we have ever seen. The new variety is a bud-sport of the common Hale, but is much larger, and bears heavier, with so signs of "little peach" so common in Hale. A late midseason variety that is almost fuzzless. Ripens a week later than J. H. Hale, when Peaches are bringing a premium price. A perfect freestone. An excellent shipper. Bears at an early age — often one-half bushel the second year. Very hardy. Tree is a more thrifty grower than Hale, and seems to be more resistant to brown rot than other kinds.

"RED GLOBE" PEACH

A New red-type Peach that is really "going places". Red Globe was released by the U. S. Dept. of Agriculture in 1954. It is the result from a cross between a seedling of Admiral Dewey x St. John and Fireglow. It is outstanding for its bright red-gold color and firm flesh. Ripens just a few days ahead of Halehaven. Fruit is round, medium to large in size, and about three-fourths of the skin is covered with a bright red blush over a yellow background. The flesh is very firm textured and of good flavor. It is especially free from any red color through the flesh. Excellent for canning and very attractive as a frozen product. Trees are productive and vigorous. A freestone. Its beautiful red coloring and early ripening means higher prices to the grower! Supply is limited — order early.

CANBY RED RASPBERRY

This new raspberry was developed at the Oregon Experiment station, a seedling of the cross of Viking Lloyd George. Our trials with this wonderful variety have proven it to be the largest and best Red Raspberry we have ever grown in our 60 years of fruit growing. Canes are completely **FREE OF THORNS** making it easy to pick the fruit. Berries are a bright, medium-light red, exceptionally **LARGE** in size and very thick-meated with small core. Distinct raspberry flavor, with far less acid than most red raspberries, making it an ideal dessert berry. A superior variety for long distant shipping because of its outstanding firmness. An exceptionally vigorous grower, with large stocky canes. Commands highest prices, for it is early ripening. Here in Michigan, it ripened the last week in June. We believe it is going to take the place of all red raspberries for home or commercial purposes. **Price: 1-Yr. No. 1 plants, 6 for \$1.75; 12 for \$3.00; 25 for \$5.00; 50 for \$8.50; 100 for \$15.00; 250 for \$35.00.** See page 45 for Bearing-Age Transplants.

What Is RA-PID-GRO? It is a complete concentrated plant food formula. Easily made into an immediate effective liquid fertilizer by simply adding water. It will speed up growth of plants now in place and will assure more successful transplanting of new plants.

HOW Is It Used? Just add water at the rate of 1 pound of Ra-Pid-Gro to 22 gallons of water. Allow to dissolve and it's ready for use. Apply around each plant according to directions on the bag. For use on small numbers of plants, mix at the rate of a teaspoonful to a quart of water. Also very valuable for use when transplanting. Dip plants in solution for three or four minutes. It will work almost unbelievable miracles in promoting rapid and healthy growth on all types of plants, as well as your lawn.

Stop Expensive and Tragic Transplanting Losses. By using a large tub or pail and mixing Ra-Pid-Gro with water at the rate of 22 gallons of water to one pound, you have a solution in which to dip the roots of the plants before setting out. If

this is done, you will practically eliminate transplanting losses. Trees, shrubs, rose, evergreens, and similar plants should be set in the solution 3 to 4 minutes, Berry plants one minute. Vegetable and house plants, just dip and remove.

How Much Will I Need? To estimate your season's requirements of Ra-Pid-Gro figure at the rate of 1 pound of Ra-Pid-Gro for each 100 pounds of other fertilizer you have been using. For a lot 40 x 60 ft. with 15 shrubs, 20 ft. of hedge, 3 fruit trees, 2 evergreens, 12 roses and 800 sq. ft. of lawn, 5 lbs. of Ra-Pid-Gro for a season's feeding.

Our fields are all fumigated and highly fertilized to give the best control of plant disease and insects.

VIRUS-FREE Planting Stock Pays off! Tests have proven that plantings made from strawberry plants grown from U.S.D.A. and Michigan Virus-Free planting stock will produce as much as 3 times as many runner plants, and increase the yield as much as 30 to 50 per cent over patches where plants were grown from standard stock. Further, varieties grown from parent stock which was substantially free of virus, produced larger, healthier, and more vigorous plants.

Be sure that YOUR basic planting stock is the very best you can get as this first plant cost is but a small portion of the final production cost. Buy your Strawberry plants from Ackerman and be sure of the best! Remember, our plants are grown from Michigan and U.S. Department of Agriculture substantially virus-free stock, as noted in description.

SENATOR DUNLAP

Now Offered from "Virus-free" Foundation Stock

One of the oldest and best varieties — a variety your Grandmother canned when you were a child. New varieties have come and gone, but the old Standby "Dunlap" is still with us. Have been sold for 56 years, and still outsells other varieties — they must be good! We sell more plants of this variety than any other kind. Will grow on any kind of soil — grown in every State in the Union — better known than any other variety. Originated by Dr. J. R. Reasoner, of Urbana, Ill.

The fruit is medium large, conical in form, regular in size, and never misshapen; dark glossy red in color. Excellent for home use. The best color — the best flavor, and best of all — so sweet it requires but very little sugar.

Plants are unusually healthy and vigorous, adapting itself to any soil or climate. Our Dunlap are grown from U.S.D.A. virus-free plants.

RED CROP

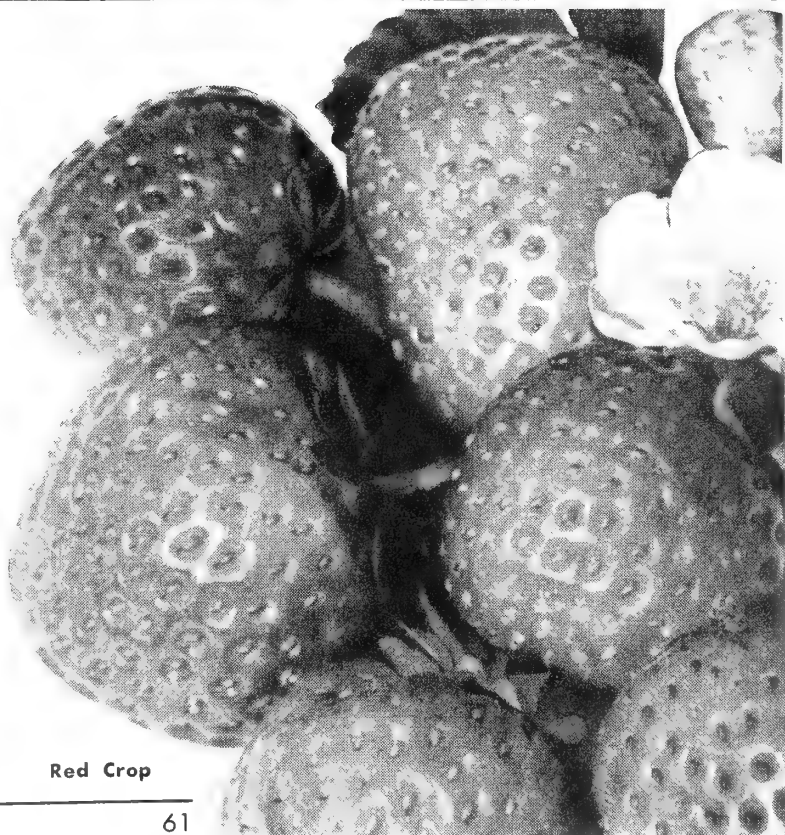

An Outstanding June-bearer

A June-bearing variety, released by the New Jersey Experiment Station in 1950. Yields so heavy, your first glimpse at your patch during the peak of the harvest, tends to make you think of a "red-cover" — therefore, the name "Red Crop". In Jersey yields of from eight to ten thousand quarts per acre have been reported, although most growers are picking somewhere around five thousand quarts per acre.

Red Crop is considered an early-mid-season variety. Plant growth is quite vigorous, making new runner plants quite freely, producing a very evenly spaced matted row. The berry is medium to large and very uniform in size; it is bright red throughout with no hollow center. It makes an excellent frozen product because of its high inside color. Its pretty bright green calyx make it sell on sight on the fresh strawberry market. Quality of fruit is good, comparing favorably with the well known Premier. Flavor is of the finest — very sweet and delicious. It has grown well in soils that have had the common red stele root disease.

PRICE: 25 for \$1.45; 50 for \$2.50; 100 for \$3.75; 250 for \$6.75; 500 for \$11.00; 1,000 for \$18.00; 2,000 for \$34.00.

Tests the past three years, have proven Armore has produced more fruit of larger size and better color than any other of the new sorts. Unrivalled for flavor — unbeatable for sugar sweetness. Armore is a perfect shipper and makes a fine picking row on light soil. If you want a quality berry, try Armore this year.

A new midseason June-bearing Strawberry which has everything to be desired in a good Strawberry for the home gardener or commercial grower. Exceptionally large, deep red in color, deliciously sweet berries; firm, a good shipper, and a good plant maker. As the berries are solid, and deep red all the way through, makes them a good variety for freezing purposes. Plants are vigorous and productive, making a good fruiting row, which means exceptionally heavy crops. Mortgage Lifter is hardy and very disease-resistant. With the heavy yields and large berries produced by this variety, your mortgage worries will be short-lived. Observations have proven this variety produces so heavy, 100 plants in your garden will provide enough fruit for an average family throughout the season, plus enough berries for your freezer. Quality of berry good. Ripens midseason, being a little later than Premier. Our Sparkle are grown from U. S. D. A. virus-free plants.
